

The King James Bible was completed in 1611.

Since 1700, there have been numerous versions and translations of the Christian Bible, particularly in English. Here are some of the most significant ones:

1. **King James Version (KJV) Revisions** (1769, Oxford Standard Text)
2. **Douay-Rheims Bible** (1749–1752, revised Challoner edition)
3. **Webster's Bible** (1833, KJV revision)
4. **Revised Version (RV)** (1881–1885, first major British revision)
5. **American Standard Version (ASV)** (1901, U.S. revision of RV)
6. **Revised Standard Version (RSV)** (1952, Protestant revision)
7. **New American Standard Bible (NASB)** (1971, conservative update of ASV)
8. **New International Version (NIV)** (1978, evangelical Protestant)
9. **New King James Version (NKJV)** (1982, modernized KJV)
10. **English Standard Version (ESV)** (2001, conservative revision of RSV)
11. **Christian Standard Bible (CSB)** (2017, revision of HCSB)

Additionally, there have been countless denominational translations (e.g., Catholic, Orthodox, Protestant) and paraphrases (e.g., *The Message*). The exact number is difficult to pin down due to minor revisions, study editions, and niche translations.

All of those produced subsequent to the King James Version reject the work or the original permitting authors to rewrite scripture in their own image.
